

Storewel's industrial tanks are ideal for your storage and processing needs.

Know why

- ✓ **Unibody construction** without joints or welds for superior durability
- ✓ **Tailor-made to suit specific needs:** chemical resistance, service temperature, specific gravity, custom materials and more....
- ✓ **Designed for indoor and outdoor usage**
- ✓ Various shapes and sizes that ensures our tanks can **support a wide range of industrial processes**

From 50 ltr. to 10,000 ltr.,
find the perfect size for your application.

Our tanks are not just containers;
they are safety solutions

Horizontal tanks

Unless noted, all horizontal tanks are open top with lid optional

Sr No.	Capacity (ltrs.)	Length (cm)	Width (cm)	Height (cm)
1	50 (loft)	52	38	33
2	100	55	55	52
3	240	69	69	66
4	280	74	74	76
5	300	133	72	49
6	450	133	69	61
7	750	161	88	75
8	800 (Double opening loft)	152	122	52
9	1500	152	91	107
10	2500	267	117	107

Vertical tanks

Cylindrical roof tanks are available in same sizes and dimensions as our regular water storage tanks (**200 ltr up to 10,000 ltr**). The material type and quantity can be customised as per requirement.

*Cylindrical conical bottom tanks are available in **1000 ltrs and 5000 ltrs** capacity*

Cylindrical Flat Top Tanks

S. No.	Capacity (Ltr)	Diameter (cm)	Height (cm)
1	200	73	50
2	500	79	111
3	1000	99	135

Since 1987, Storewel has become a synonym for strength, durability and reliability. As a result, Storewel tanks are widely used for various industrial purposes, such as chemical processing, acid pickling, electroplating and storage of hazardous chemicals among others.

These tanks are non-toxic, non-absorbent and chemical resistant. Special grades of materials and additives are used for manufacturing these tanks to make them strong, sturdy, bulging-resistant and UV resistant.

Storewel tanks are manufactured by a unique **Rotational Moulding process**, which makes them seamless, leakproof and sturdy. Because of specially designed built-in ribs, they can sustain more stresses of contraction and expansion due to temperature and store a range of high-density chemicals.

Storewel is an ISO 9001:2015 certified organisation which complies with all applicable government norms and adopts good manufacturing practices.
