

Designed for Durability. Built for Trust.

Storewel is a trusted manufacturer of high-quality water storage solutions, providing durable, safe, and reliable products for over 35 years. Storewel tanks, produced using advanced rotational moulding technology, are designed for both residential and industrial use, ensuring long-lasting performance and protection. Storewel water tanks come in a variety of capacities, colors, and specifications to suit different needs.

Product Overview:

Roof Tanks

Designed for overhead storage applications, providing an efficient solution for residential and commercial needs.

Loft Tanks

Compact and sleek, ideal for space constrained indoor installations.

**From 50 ltr. to 10,000 ltr. Our tanks are not just containers;
find the perfect size for your application. they are safety solutions**

Why Storewel Water Tanks?

- ✔ **Proven Quality and Certification**
ISO 9001 Certified for over **20+ years**, ensuring consistent quality management.
BIS Certified for over **25+ years**, meeting stringent safety and performance standards.
- ✔ **Premium Material**
Manufactured using **prime-grade virgin plastic**, ensuring superior strength and durability. Non-toxic, food-grade plastic guarantees safe water storage without contamination.
- ✔ **Advanced Technology**
Produced using rotational **moulding** for a **seamless, unibody construction**. Unibody design eliminates weak points, providing leak-proof and long-lasting durability.
- ✔ **Enhanced UV Protection**
Built-in UV stabilizers ensure that tanks can withstand prolonged sunlight exposure without degradation. Proven longevity with products still in use even after **decades**.
- ✔ **Innovative Security Features**
Heavy-duty lids with a **locking system** prevent unauthorized access and contamination. Lids are designed to withstand impact and resist environmental damage.
- ✔ **Wide Range of Sizes and Customization**
Capacities range from **50 litres** for small domestic needs to **10,000 litres** for large-scale storage.

Capacities range from 50 liters for small domestic needs to 10,000 litres Cylindrical Roof Tanks for large-scale storage.

Key Applications

Domestic Water Storage

Use: Daily household water requirements, including cooking, cleaning, and drinking.

Commercial Building Applications

Use: Supplying water to high-rise buildings, office complexes, and commercial establishments.

Agricultural & Industrial Storage

Use: Irrigation, livestock water supply, and large-scale water storage

Storewel's water storage tanks are more than just containers; they are engineered safety solutions. Our focus is on ensuring superior strength, hygiene, and long-term value. From the smallest 50-liter household tank to a high-capacity 10,000-liter industrial tank, Storewel has established itself as a leader in the water storage industry. With over 35 years of expertise and a dedicated commitment to quality, Every Storewel tank is crafted to safeguard life's most essential resource: water
